 LinkedIn: [Ahmed Hamdy](#) | [My Portfolio](#) |  GitHub: [Ahmed Hamdy](#)

Summary

Backend Developer specializing in PHP and Laravel, experienced in building secure, scalable, and production-ready applications. Proficient in OOP, MVC, SOLID principles, and developing robust RESTful APIs. Skilled in real-time features, caching, queues, and high-concurrency systems. Passionate about clean code, performance optimization, and delivering reliable backend solutions.

Education

Zagazig University, Faculty of Computer and Information Bachelor of Information Technology, Graduated: 2025

Technical Skills

Programming & Frameworks: PHP (OOP, MVC, SOLID), Laravel (Authentication, APIs, Migrations, Emails & Notifications)

Databases: MySQL (ERD, UML Diagrams, Query Optimization)

Frontend: HTML5, CSS3, JavaScript

Tools & Practices: Git/GitHub, Web Hosting, API Integration & Security, Testing

- Delivered as a real-world solution improving efficiency and customer service

Projects

[Car Wash Management System – Laravel API](#)

JANUARY 2026- DECEMBER 2025

- Backend system for managing car wash bookings built with Laravel.
- Allows users to book car wash services with scheduled pickup times, while car wash owners manage orders, working hours, and confirmations.

- The system includes authentication, order validation, email notifications, and queued background jobs.

Educational Management System (Laravel RESTful API)

MARSH 2025

- Developed a scalable educational system using Laravel as a RESTful API supporting multiple user roles (Admin, Instructor, and Student).
- Implemented authentication, course management, and role-based access control, with a clean database design and API-ready architecture.

FC Legend – Football Tournament Management System (In Progress)

- Developing a football tournament management platform using Laravel and MySQL.
- Implemented authentication and authorization with multiple user roles.
- Designed and developed RESTful APIs for managing tournaments, teams, fixtures, and standings.
- Built match management features including match events, scheduling, and result tracking.
- Applied database relationships, validation, queues, events, and caching concepts.
- Following clean architecture and best practices in Laravel development.

Courses & Certifications

- INSTANT Backend Development (Advanced PHP, MySQL, Advanced Laravel) FEBRUARY 2025
- **National Telecommunication Institute (NTI)**
Full Stack Web Development Using PHP (HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, MySQL, Git.) FEBRUARY 2026

Languages

- English: Intermediate
- Arabic: Native
